Sir:

In response to the Office Action mailed July 25, 2007, applicants elect Group XII directed to claims 23-24. This election is made with traverse with regard to the restriction of Group XII from Group III, directed to claim 8.

The two groups of claims differ in the sample tested (a population of cells versus a body fluid), the reagent (one or more antibodies versus a molecule comprising an antibody variable region), and the preamble (method of identifying endothelial cells versus method of screening for neoangiogenesis). It is respectfully submitted that these differences are not so great that they would present an undue search burden if the groups were rejoined.

Applicants elect as a species the protein known as secreted protein, acidic, cysteine-rich (osteonectin). Each of claims 23, 24, and 8 read on this species.

Please extend the time for responding to January 25, 2008, *i.e.*, for five months. Please charge the fee of \$2,230.00 to our deposit account number 19-0733.

Respectfully submitted,

BANNER & WITCOFF, LTD.
